

Connector-Backshell Interface Index

The following are lists of specifications and associated connector manufacturers' part number series with common rear accessory interfaces. These listings do not imply qualification status of the manufacturers indicated for each specification series. The listings are for the purpose of identification of common interface data

under the applicable Connector Designator symbol, an essential element used in Glenair's accessory part number developments.

For connector manufacturers' part number series not shown in these listings, please consult factory for applicable accessory part numbers.
