Connector shells, plating, inserts, contacts, environmental seals, assembly and test all controlled in-house

Glenair Series ITS reverse-bayonet power and signal connectors

Our Commitment to Quality

Management System Certifications for Quality

- **ISO 9001**: the worldwide recognized manufacturing quality system. All Glenair facilities are ISO 9001 certified.

- **IRIS**: this system is based on ISO 9001 with additional requirements for the railway sector. Glenair’s Italian operation, located in Bologna, is certified to the IRIS standard for mass transit market interconnect technologies.

- **EN 9100**: also based on ISO 9001, this standard incorporates additional Aviation, Space and Defense industry language and requirements. Glenair UK and Glenair Italy’s ISO 9001 quality systems are augmented by additional certification to EN9100.

- **EN 9120**: another system based on ISO 9001 with specific requirements on Aviation, Space and Defence industries. It covers all Glenair operations in relation to these three sectors.
VG 95234, VG 95328, VG 95351, VG 96929, VG 96934: these are certifications for five product families. They certify that our family of products guarantee the minimum performance requirements laid down by the relevant standard. They are issued by an institution of the German Ministry of Defense (BAAINBw) and are recognized by military entities in all NATO countries.

UL: Upon request, some connectors from the ITS Series can be marked as a “UL Recognized Component.”

ATEX/IECEx: Glenair is a qualified manufacturer of connectors for potential explosive zone use according to IEC/EN 60079.

ISO / IEC 17025: this Test Lab certification has been attained by Glenair’s in-house test laboratory for a broad range of electrical and optical testing, including high voltage and high vib/shock.
Rugged Power and Signal Connectors for Mass Transit

High current/high voltage electrical connectors for traction motor, lighting, data communications and more.

The interconnection of power transmission cables in traction motors is a critical application. Conventional systems may employ bulky and inefficiently-sealed junction boxes for cable interconnection. Glenair offers a number of different special-purpose designs for traction motors and other power requirements on transit cars. Features such as integral mounting, robust environmental sealing, screw and/or lever-action mating, as well as compliance to transit industry standards such as IRIS, FST, and RoHS make Glenair the natural design partner and supplier to the worldwide mass transit / rail industry. The following pages present an overview of our most popular power and signal connector series, principally manufactured, tested, and qualified in our Bologna, Italy factory. Glenair delivers worldwide application engineering and support to the mass transit / rail industry with support teams located in every major market.

- Innovative screw and lever mated power connectors for mass transit / rail applications
- Proven performance and qualification credentials in hundreds of installations
- IRIS International Railway Industry Standard certified (Rev. 02, May 2009)
RUGGED
Power and Signal Connectors for mass transit applications
IRT Rectangular Multipole Connectors

SERIES IRT RECTANGULAR MULTIPOLE HIGH VOLTAGE TRACTION MOTOR CONNECTORS

The Glenair IRT series is a rectangular power connector for harsh environmental conditions. Available with three, four and six contacts, typical for traction motor applications. Suitable for single cables AWG 4 – 373MCM (35 to 185 mmq). Working voltage up to 3000 Vcc.

Two mating systems offered:
- Screws, for light weight and reduced dimensions
- Lever system with secondary lock, easy-to-use in difficult positions.

The IRT Series is suitable for separated power cables, with or without shielding, ground body available with a copper plait.

Available with three different cable back-end styles:
- Metallic gland
- Clamp with strain relief
- EMC shield and gland

UJ Series Power Joint Connector System

UJ SERIES UNIPOLE POWER JOINT CONNECTOR SYSTEM

The Glenair UJ Power Joint system allows connection of medium and high power cables without the need for bulky junction boxes. The UJ Power Joint System offers the same environmental protection with substantial size and weight savings and better temperature tolerance than junction boxes.

Easy 4-step mating

Step 1: mate terminal blocks with screw

Step 2: slide protective positioner into place to maintain correct terminal block positioning in plastic body

Step 3: slide the waterproof gland with metal rings and compression gland into position behind the terminal block. Tighten the cable clamp.

Step 4: repeat steps 2–3 for the other side. The assembly is complete.

### ITS 901 SERIES REVERSE BAYONET MULTI-POLE MEDIUM VOLTAGE JUMPER CONNECTORS

ITS 901 Series is the extension of the ITS Reverse Bayonet connector family, for power cables over AWG 1/0. Suitable for harsh environmental conditions, 901 Series Connectors accept cable from AWG 4 to 262 MCM (35 - 120 mmq), for current up to 450 Amps. Working voltage is from 800 - 1000 VAC. Available for single wires and multipole jacketed cables, with cable clamp or conduit. Male contacts offer Finger Test Protection, Load Side (Receptacle or Plug). Long bayonet ramps, three polarization keys and rubber recovered coupling facilitate mating and unmating operations. 901 Series meet the most important rail requirements and specifications:

- Salt Spray Test Corrosion: 500 hours;
- 500 Mating Cycles;
- Shock and Vibrations for Under-Car and Car-To-Car Applications;
- IP67 Sealing (Coupled Connectors);
- Fire Resistant and RoHS Compliant Materials.

### ITS 500 SERIES REVERSE BAYONET SINGLE-POLE HIGH VOLTAGE JUMPER CONNECTORS

ITS 500 Series derives from the VG96929 Military Specification for Power Connectors. Suitable for harsh environmental conditions, ITS 500 accepts cable gauges AWG 3/0 to 444MCM (95-240 mmq), for current up to 750 Amps. Special insulator drawing allows high working voltage, up to 3000 Vcc. Suitable for jacketed cables, with or without conduit protection. Receptacle with finger protection (Load side).

ITS 500 meets the most important rail requirements and specifications:

- 500 Mating Cycles
- Salt Spray Test Corrosion: 500 hours
- Shock and Vibrations for Under-Car and Car-To-Car Applications
- IP67 Sealing (Coupled Connectors)
- Fire Resistant and RoHS Compliant Materials

### ITZ SERIES WITH RAPID-ADVANCE THREADED COUPLING

The ITZ connector series provides the same electrical characteristics as the IT and ITS families, but utilizes rapid-advance threaded coupling in place of bayonet coupling. Originally designed to be used on special amphibious military vehicles, the series evolved into a versatile railway and industrial connector, used where threaded coupling is desired. The ITZ connector series uses solder and crimp contacts in accordance with MIL-C-5015 and a trapezoidal threaded coupling system with rubber O-ring environmental seals.

- Aluminum alloy construction with electrodeposited (cataphoresis) black coating (F6)
- Copper alloy contacts, silver plated
- Oil-resistant synthetic rubber insulators and O-rings
- Temperature tolerance -55° to +125°C
RUGGED
Power and Signal Connectors for mass transit applications

FR ITS · ITH · ITK

FR ITS SERIES
FR ITS is the fire-resistant ITS connector series, designed with Flame, Smoke, and Toxicity-compliant insulating materials. FRITS is broadly utilized for environmental and non-environmental rail applications. More than 230 insert arrangements are available, from 1 to 150 contacts. FRITS connectors are RoHS-compliant, and IP67 environmentally sealed. Available FRITS - STR backshells provide versatile locking of cables or wires into the connector, providing IP67 sealing and EMI/RFI termination.

ITH SERIES
The ITH connector series is based on the MIL-C-5015 standard, but with improved reverse bayonet coupling. Rigid inserts and crimp contacts provide better electrical insulation and reduced assembly time. The 3-point, positive-locking reverse bayonet coupling mechanism provides easier mating in awkward positions, reliable resistance to vibration and shock, and prevents de-coupling. ITH connectors conform to the VG95234 standard, French (NFF 61030) electrical standards, as well as EEC compliance directives for electromagnetic compatibility. EMI shield termination accessories are available for both overall as well as individual wire shields.

• Design IAW MIL-C-5015 and VG95234
• Temperature range -40°C to +100°C (conductive plating) or -55°C to +125°C (non-conductive plating)
• RoHS compliant
• Low fire hazard inserts, UL94V0 and NFF 16-102 compliant
• Halogen-free silicone rubber gaskets per NFF 16-102

ITK SERIES
The high-temperature tolerant ITK series is a rugged reverse-bayonet mating connector that utilizes stainless steel connector shells and special high-temperature ceramic inserts. Compliant to EN 45545 standards, ITK connectors are capable of operation at +700°C for 15 minutes without electrical discontinuity.

• Ultra high-temperature tolerant ceramic inserts
• Stainless-steel construction
• EN 45545 compliant
• Operates at +700°C for 15 minutes, with no electrical discontinuity
## RUGGED

**Power and Signal Connectors for mass transit applications**

**Micro-Switch · One Cable - Two Contacts · ERTMS**

### MICRO-SWITCH CONNECTOR

The Glenair Micro-Switch connector is a rugged, reverse-bayonet connector for enhanced-safety mating in rail applications. The connector is supplied with 3 #4/0 power contacts and a specially-designed sensing contact that allows current to flow only when the connector pair is fully mated.

- 3 #4/0 contacts and 1 sensing contact
- Thermoplastic resin insert (UL94 V0)
- IP67 environmental sealing
- Sensing contact is suitable for standard cavity
- 4 Amps current rating
- Operating Temp: -30°C to +75°C
- Solder lug termination

### ONE CABLE - TWO CONTACTS

The “One Cable - Two Contacts” system is a rugged, RFI-shielded connector design that divides the source power in a 70 mmq cable into two contacts of 35 mmq each, enabling the plug connector to divide and deliver RFI shielded power via two separate cables. Designs for additional contact gages and power requirements are available. Mated pairs are sealed to IP67.

### ERTMS INTERCONNECTION SYSTEM

Specially designed for utilization on the European Rail Traffic Management System, the ERTMS connector family offers plug connectors with integrated RFI shield termination backshells for complete electromagnetic compatibility when mated. Mated pairs offer IP67 environmental sealing.

### “STINGER” SYSTEM

The Stinger System connector is equipped with integrated short circuit contacts which will cut power should the single-pole power circuit be unmated under load. The push-pull connector incorporates a fully insulated (rubber covered) coupling nut for additional user safety. Three backshell/rear fitting options accommodate conduit, PG gland, or rubber-covered backshell.
SERIES ITS & DERIVATIVES

Ruggedized circular power and signal connectors for high-speed, high-heat, and high-voltage mass transit applications

- Dozens of proven connector technologies for harsh application environments
- Hundreds of power and signal contact arrangements (crimp and solder)
- Threaded, reverse bayonet, and innovative latch-and-lock coupling technologies
- Flame-resistant, caustic substance-free material choices for RoHS and other compliance standards

Octobyte™
The faster ruggedized 4/8 pole interconnect system for Ethernet data applications

Glenair series ITH connectors with Ethernet-ready Octobyte™ contacts are available for harsh-environment mass transit applications that depend on sealed environmental (IP67) connector performance. Octobyte contacts, packaged in ruggedized ITH reverse-bayonet connectors, deliver both dedicated Ethernet datalink as well as mixed serial databus and power for high-speed data applications. Octobyte™ contacts are vibration resistant and designed to work with Ethernet cables from CAT 5 to CAT 7A, MVB-WTB, and RG58 Coax. Reverse-bayonet ITH series connectors with Octobyte™ contacts are easy and fast to assemble and deliver reliable locking performance in severe vibration and shock applications.

- For harsh-environment transit, industrial, or marine/subsea applications
- RF Coax applications (RG58 and RG59U cables)
- High-speed interconnect solution for audio, video, and digital displays
- Qualified for use in safety systems, sensors, detection devices, and control panels
- Tested in accordance with: ISO F0 STP: CAT 7A
  EN50173-1 F600-STP: CAT 7
  EN50173-1 D STP: CAT 5E

Tested for compliance IAW EN50173-1 standards for CAT5E and CAT7. Proven performance in numerous rail applications (consult factory for references).

SERIES ITH CONNECTORS FOR OCTOBYTE CONTACTS

Reverse bayonet-lock connectors

Rugged environmental performance — the perfect Octobyte packaging solution

Dozens of contact arrangements available including hybrid Octobyte, power, and signal.

Ethernet-ready Octobyte solutions for rail and transit applications are available as discrete contacts, packaged in rugged reverse-bayonet ITH series connectors, or as turnkey inside-the-box or environmental cable assemblies, tested and ready for immediate use.

- Rugged MIL-DTL-5015 type design with fast reverse bayonet coupling
- Rigid dielectric inserts with contact retention clips
- Positive lock technology provides reliable vibration and shock resistance
- Proven performance in even the most rugged applications
- Conforms to the European VG 95234 standard, French (NFF 61030) and British (BS 6853) electrical standards and EEC compliance directives
- Threaded coupling version available, contact factory for ordering information

RadGrip rubber-covered coupling nuts available in a wide range of colors including safety red
SUPERSEAL RJ45/USB

Ruggedized RJ45 and USB connectors for sealed environmental Ethernet performance

IP67 sealed connectors, robust insert-to-shell grounding, with a complete range of wire, cable, and circuit board terminations

- Superior sealing—IP67 unmated—for complete system protection against water, sand and dust
- Highly durable RJ45 design, including enhanced operating temperature, increased life-cycle, and rugged vibration and shock performance
- Shielded/grounded coupler designs in both receptacle and plug connectors
- Crimp, solder-cup, PC tail, and Quadrax contact/wire termination options
- RJ45 plug and/or jack interface options available in Cat 5e or Cat 6a
- MIL-DTL-38999 type versions intermateable with other RJ45 field-duty connectors

MIL-DTL-38999 Series III with sealed RJ45
MIL-DTL-38999 Series III with USB jack and jumper

**RADGRIP™ COUPLING NUTS**

For fast, easy mating of ITS Series bayonet connectors *plus* improved coupling nut mechanical protection

**Better grip, improved durability**

Glenair ITS-RG Series connector plugs with RadGrip™ rubber coupling nut covers was developed for harsh environmental field applications. RadGrip™ covers feature wide, easy-to-grip castellations as well as a raised thumb tab. Built for maximum durability and mechanical protection of plug coupling nuts, RadGrip™ is the perfect solution for advanced protection against shock and other forms of mechanical damage. In addition, RadGrip™ facilitates rapid mating and demating of connectors, even when surfaces are contaminated with oil, dust, water and other fluids. The highly durable rubber compound may be specified in seven different colors for improved connector and cable identification.

Colors available: Black, Yellow, Red, Blue, Light Green, Orange and Grey.

**RadGrip™ material specifications**

IAW UNI-CEI 11170 - AFNOR NF-F 16101 - BSS 7239 - ASTME - 162, ASTM E-662

RadGrip™ covers adhere easily to Aluminum alloy, Stainless steel and Marine bronze.

- Fast, easy 1/4 turn bayonet coupling
- Ergonomically designed for use with gloves
- High Shock and Vibration Resistant
- Compatible with all Series ITS 5015 type connector shell sizes
- Durable chemical-resistant material
- Colored materials facilitate connector and cable identification and/or connector phases

Glenair industrial/rail interconnect solutions are at home in a broad range of harsh-environment mass transit applications.

Glenair is the world’s only supplier of 5015 type (Series ITS reverse-bayonet) connectors that also manufactures a complete range of wire and cable protection systems such as this engine compartment conduit assembly.
Innovative Strain Relief
Backshell Cable Clamps,
Protective Covers and Adapters

STANDARD AND SPECIAL DESIGN BACKSHELLS AND ACCESSORIES FOR RAIL CONNECTORS

IT and ITS Series backshells are available for every wire and connector protection requirement

Integrated clamping system for UJ connectors eliminates the need for bulky junction boxes

Integral 90° backshell configurations and resilient rubber coupling nut covers

Protective covers for plugs and receptacles, and spring-loaded stainless steel receptacle covers

Special strain-relief backshell invented by Glenair for use on the French TGV rail system. This backshell design resolved complex intercar vibration and shock problems which resulted in destructive cable damage.

INNOVATIVE
Backshells and dust covers

COMPOSITE BACKSHELL DESIGNS

- Band-in-a-Can composite backshell
- Split-shell low profile composite banding backshells
- All-in-one booted “Piggyback” backshell
- Isolated conductive ground path

COMMERCIAL CABLE CLAMP DESIGNS

- Broader range of plating options available
- Composite Swing-Arm with keyed drop-in banding insert
- Open-frame composite strain relief
- Composite strain relief backshell

INNOVATIVE PROTECTIVE COVER DESIGNS

- Bean Rubber USB dustcaps
- Self-locking, anti-decoupling protective covers
- Mil-grade RF protective covers and accessories
- Spring-loaded “flop-lid” protective cover

STANDARD AND PRESSURE BOUNDARY FEED-THRUS

- High-grade engineering thermoplastic or machined metal
- Six pressure-boundary feed-thru layouts with accommodation for 1 – 6 cables
- Split-shell jam nut versions with EMI/RFI shield termination porch
- O-ring sealed panel and box mounting interface
- Conductive and non-conductive finish options
SERIES 77

Mechanical and environmental protection/strain relief for connector-to-cable transitions

- Standard, short, long and 90° lipped and lipless boots
- Choice of six boot materials and a complete range of high-performance adhesive types
- A wide range of colors including desert tan
- The industry’s largest selection of metal and composite shrink boot adapters
- All popular part numbers in stock and ready for same-day shipment

Standard Lipped or Lipless Boots
Transitions
Convoluted Boots
SERIES 77
Heat-shrink boots
for environmental sealing and strain relief

HOT AND COLD SHRINK BOOTS AND TUBING FOR RUGGED ENVIRONMENTAL APPLICATIONS

- Standard lipped or lipless boots
- Convoluted accordion boots
- long tail and high-ratio configurations
- Y, T, and multibranch transitions
- 90° and 45° angle boots
- SuperFly, Mighty Mouse, and D-subminiature configurations
- AutoShrink cold-shrink tubing

SELECTED ENVIRONMENTAL SHRINK BOOT COLOR OPTIONS

- Olive drab 45° boot
- Desert Tan widebody Y transition
- Right-angle adapter, purple
- 4-1 widebody transition, yellow
- Green long-tail boot
- High-ratio right-angle adapter, grey
- Low-profile 3-1 adapter, white

PIGGYBACK SHRINK BOOT ADAPTERS

- Environmental piggyback adapter with pre-installed boot, ready for heat shrink
- Heat shrink recovery completed with significant time saved
- Composite, aluminum, or stainless steel environmental feed-thru with piggyback boot
- Composite band-in-a-can piggyback boot adapter

HEAT SHRINK TERMINATION (HST) SLEEVES AND IN-LINE SINGLE-CIRCUIT SPLICE KITS

- HST sleeves available with wire leads or with weight-saving AmberStrand or ArmorLite EMI/RFI braid leads
- AS81824/1 Qualified inline splice kits include crimp termination sleeve and heat shrink seal
- Example rectangular interconnect assembly outfitted with heat shrink termination grounds

TurboFlex™ power distribution cables are constructed from highly flexible conductors and high-performance insulation to produce cables ideally suited for applications where flexibility, durability, and weight reduction are required. Amazingly durable and flexible—especially in cold weather—the 16 AWG to 450 MCM TurboFlex cable features high strand count rope lay inner conductors made with tin-, nickel- and silver-plated copper. TurboFlex is jacketed with Glenair’s unique Duralectric™ compound that provides outstanding flexibility and resistance to environmental and chemical exposure. Duralectric is also low smoke, zero halogen. Long life and performance are critical in power distribution applications. TurboFlex, with its flexible conductors and durable jacket delivers both.

Ultra flexible rope lay construction

Available in a broad range of gages, 16 AWG to 450 MCM

Many sizes in-stock and available for immediate, same-day shipment. No minimums!

Duralectric™ is the high-performance TurboFlex™ jacketing material perfectly suited for immersion, chemical or caustic fluid exposure, temperature extremes, UV radiation and more—available in a broad range of colors including safety orange.

**DURALECTRIC® HIGH-TEMP, HALOGEN-FREE, CHEMICALLY RESISTANT JACKETING**

- Duralectric® is high-performance elastomeric material for use as wire insulation, cable jacketing, conduit jacketing, cable/conduit overmolding, and molded boots. Perfectly suited for immersion, chemical or caustic fluid exposure, temperature extremes, UV radiation and more.

- **Service temperature range:** -65°C to 225°C (Duralectric K: -110° to 225°C)
- **Fire-resistant, Low Smoke-Zero Halogen (LSZH)**
- **Mil-aero and industrial fluid-resistant**
- **Accelerated UV/sunlight resistant, 53 year equivalent exposure**
- **Ozone resistant IAW ASTM D518**
- **Moldable and extrudable**

POLYMER AND METAL-CORE

Conduit wire protection for bus and transit applications

SERIES 72 ANNULAR CONVOLUTED BULK TUBING

Conduit colors include standard black, natural, blue, yellow, red, desert tan, and orange

Any of Glenair’s annular polymer-core tubings can be provided slit, for on-site installation or addition of wires in open wire loom applications. Use the Wire Loom Tool for easy wire insertion

In-house manufacturing allows Glenair to design and fabricate non-standard shapes such as oval profile for specialized wire routing applications

Braid and jacketing options for EMI, chemical, environmental and rodent protection

Conduit Tubing Material Choices

<table>
<thead>
<tr>
<th>Material</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kynar®</td>
<td>Flexible, thermally stabilized, resistant to harsh chemicals and radiation. UV resistant, self-extinguishing, nontoxic and resistant to low-temperatures. 166°C temp. rating.</td>
</tr>
<tr>
<td>PVDF</td>
<td>Flexible and chemical/radiation resistant. Available in 4 colors plus standard black and natural. 150°C temperature rating.</td>
</tr>
<tr>
<td>G-FLEX Siltem</td>
<td>Lightweight, halogen-free, low toxicity, low smoke. 175°C temperature rating. Ideal for harsh environment applications. Exceptional flexibility and crush resistance.</td>
</tr>
</tbody>
</table>

- Lightweight, flexible polymer-core materials and easy to install fittings, transitions and adapters
- A wide range of colors including safety orange and desert tan
- Internal and external braided shielding provides outstanding EMI/RFI, environmental, chemical and rodent protection
- User-installable or turnkey, factory-terminated assemblies

Turnkey connectorized factory conduit assembly for power charging application

GUARDIAN SERIES LIGHTWEIGHT COMPOSITE EASY-TO-INSTALL CONDUIT SYSTEM

- Economical and easy to install. *It's a snap!*
- General duty, all-purpose wire protection
- O-ring equipped environmental sealing (splash-proof)
- Self-locking coupling nuts
- Band and shrink-boot ready
- Metal and composite thermoplastic materials

Easy installation:
1. Install pair of provided O-rings on the two forwardmost tubing convolutes
2. Insert tubing into fitting
3. Run provided retaining clip into slot, aligned with the third convolution of conduit, behind the 2 O-rings.

SERIES 74 HELICAL CONVOLUTED POLYMER-CORE TUBING AND FITTINGS

- Lightweight, flexible helical polymer-core materials and easy to install fittings, transitions and adapters
- Choice of five materials: ETFE, FEP, PFA, PTFE, and low-smoke, halogen-free PEEK
- Factory-terminated assemblies or user-installable configurations
- All popular part numbers in stock and ready for same-day shipment

SERIES 75 METAL-CORE CONDUIT AND FITTINGS

- Choice of three materials: Brass, Stainless Steel, and Nickel Iron Alloy
- Turnkey, factory-terminated assemblies for harsh environments
- All materials deliver superior EMC performance as well as crush resistance and environmental sealing

TURNKEY FACTORY-TERMINATED POINT-TO-POINT AND MULTIBRANCH CONDUIT ASSEMBLIES

COSTSAVER

Composite Interconnect Junction Boxes

Sealed, corrosion-free housings for IT and WiFi applications on modern trains and buses

Rider WiFi
modern trains and buses feature high-speed, secure WiFi

Digital Signage
displaying real-time departure and arrival information, plus streaming passenger entertainment

Payment System
accepts and processes fares on a network

Router
ruggedized for in-vehicle network

Surveillance Cameras
for passenger and driver safety and security onboard

GPS / Vehicle Tracking
real-time location and route information for passengers

Driver Tablet
to access real-time information for efficient routing
CostSaver Composite Junction Boxes

Lightweight, corrosion-free housings for WiFi and other IT applications

- Over a dozen different tooled sizes and shapes.
- Made-to-order configurations available—just ask.
- Extremely durable, corrosion-free, high temperature engineering composite thermoplastic
- Tested and qualified to U.S. Navy, UK MOD, transit, aircraft and marine applications

Install it and forget it: Glenair corrosion-free EMI/RFI shielded composite junction boxes

Ultra-Lightweight and Corrosion-Free

- Series 316 stainless steel hardware provides long-term durability
- IP67 rated seals and gaskets protect equipment from moisture and dust
- Unlimited corrosion resistance compared to metal junction boxes reduces repair and maintenance costs.
- Glass-reinforced composite thermoplastic material is strong and durable and yet extremely lightweight.
- Low harmonic resonance and inherent attenuating properties reduce loosening and decoupling of feed-through fittings and accessories.

Glenair EMI/RFI CostSaver Composite Junction Box application—protecting and storing fiber optic media service loops
GROUNDING AND SHIELDING TECHNOLOGIES
EMI/RFI braided shielding, ground straps, and earth bond tooling

- Complete range of QQ-B-575B/A-A and ASTM B conductive braided shielding solutions
- High performance tubular fabric braided sleeving for every mechanical and wire-protection application requirement
- Broad range of lightweight as well as heavy-duty ground strap/bonding technologies
- Rail industry qualified earth bond tooling and ground studs

World's largest selection of metal and fabric cable shields, ground straps, and tools

BRAIDED GROUNDING STRAPS

- Lightweight ArmorLite™ microfilament ground straps
- General duty, configurable ground straps
- Heavy-duty 3-layer configuration
- Special application materials, jacketing, and lug configurations

GroundControl™ EARTH BOND SYSTEM

- One-hand operation and ram retract mechanism actuated by release trigger

MasterWrap™

- Flexible, field-installable/repairable side-entry EMI/RFI shielding with ArmorLite™ technology
- Spot-coverage mesh tape in lightweight ArmorLite™ or Nomex braid material
Band-Master ATS®

EMI/RFI Shield Termination System

Quick, easy, cost-effective and highly reliable termination of braided metallic shielding or fabric braid to connectors and backshells

Band-Master ATS® is the advanced termination system for interconnect cable shielding. The unique low profile and smooth inside diameter of the one-piece type 304 austenitic stainless steel clamping band virtually eliminates RFI/EMI/EMP leakage paths. The lock maintains constant tension under extreme environmental conditions. Band-Master ATS® bands have passed severe shock, vibration and thermal cycle testing with negligible deterioration of shell conductivity.

BAND-MASTER ATS® ADVANCED TERMINATION SYSTEM

- Precision hand-held tool and bands deliver reliable, repeatable performance
- Integrated digital counter aids in identifying calibration intervals
- Single-piece stainless steel bands in various sizes and lengths
- Clamp both small and large diameters easily and reliably
- Qualified for both military and commercial programs

Easy-to-use manual tools with built-in calibration counter
High-volume pneumatic tool for bench use
Save time and tool maintenance costs with the Glenair band tool calibration system

3 lengths and 3 widths of EMI braid termination bands plus new slim standard bands for size and weight savings—50% lighter and lower-profile than standard bands.
Super ITS™

Reverse-bayonet derivatives of MIL-DTL-5015 (VG95234) connectors have long been preferred for their rapid mating and rugged resistance to vibration and shock in harsh environment applications such as mass transit, rail, and military vehicles. Now Glenair introduces an ultra high-performance version of the reverse-bayonet 5015 power connector called the Super ITS. This series is designed for high-ampacity applications where low insertion force LouverBand type contacts, mechanical contact retention, broad temperature tolerance, and superior connector and wire sealing is required. Super ITS is an extremely durable and environmentally-sealed connector, designed in accordance with legacy MIL-C-5015, EN50124, and VDE 0110-1 requirements. Unlike conventional 5015-type connectors designed for industrial and rail applications, the Super ITS offers uncompromising electrical, mechanical, and environmental performance—including 2000 mating cycles. Designed for extreme harsh environments such as found in heavy industries, mining, military vehicles, offshore and shipboard applications, the Super ITS delivers contact and wire support from #16 to 2/0 and 1 mm² – 70 mm² respectively. With ampacity up to 350 amps, and a max working voltage of 2450 VCC / 1750 VCA, the Super ITS represents the ultimate in industrial power interconnection.

PRODUCT SELECTION GUIDE

Wall Mount Receptacle Connector

Straight Plug connector

Jam Nut Receptacle Connector

In-Line Receptacle Connector
SERIES 970
PowerTrip®
The power connector for extreme environments

PowerTrip®
- Fast, easy mating with triple-start ACME thread: 360° turn for full mating
- Reduced size and weight compared to 5015/VG95234 solutions
- LouverBand sockets for improved current ratings and longer life, up to 2000 mating cycles
- Splined backshell interface for improved backshell attachment and EMI shielding
- Ratcheting coupling nut for secure mating
- Operating temperature -65° C to +200° C
- Hermetic and filter options available

The Series 970 PowerTrip® offers improved performance compared to standard 5015 type power connectors: higher density and lighter weight packaging, rapid mating and demating triple-start threaded coupling, and extremely rugged splined and threaded backshell attachment interface.
