

**Respiratory Protection:** If installation occurs in a confined, unventilated area, NIOSH/MSHA-approved respirators are recommended.

**Protective Clothing:** OSHA, ANSI, or NIOSH guidelines should be followed. If there is a danger of molten material contacting the skin or eyes, use eye/face protection and heat resistant gloves. If it is necessary to handle grossly overheated or fire-damaged products, wear natural rubber gloves to prevent possible contact with potentially corrosive inorganic acid residues.

**Transportation:** These products are non-hazardous under Department of Transportation Regulations 49, CFR Section 171.8, IATA, IMO, and AFR 71-4. Because there are no applicable shipping regulations for these products, labels are not required on the outside shipping container for these products and all products may be shipped through the U.S. Postal Services.

**Disposal:** Dispose in accordance with all local, state and federal regulations. If there are local regulations covering the controlled incineration of halogenated materials, then all halogen-containing products will be subject to such regulations. Refer to the product literature for identification of halogen-containing products.

**Installation:** Follow appropriate Raychem installation instructions and application guides to ensure that installation is performed properly. Ensure that any local requirements/legislation concerning the use of hand-held electrical equipment are observed. When using IR (infrared) heating devices, observe specific instructions. Do not touch hot surfaces on installation equipment.

## EMERGENCY AND FIRST AID PROCEDURES

**Eyes:** If eye irritation occurs, hold eyelids apart and flush affected area(s) with clean water. Seek medical attention.

**Skin:** First aid is normally not required. After handling product, it is good work practice to wash your hands. If molten material contacts skin, cool area immediately in water. DO NOT attempt to remove material from the skin. Treat as a burn, and seek medical attention.

**Ingestion:** Not a normal route of exposure. However, if swallowed and symptoms develop, seek medical attention.

**Inhalation:** If respiratory symptoms or other symptoms of exposure develop, move victim to fresh air. If symptoms persist, seek medical attention. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention. If victim is not breathing, immediately begin artificial respiration. Keep victim warm and quiet; seek immediate medical attention.

**Steps to be Taken in Case of Release or Spill:** Wear appropriate personal protection when responding then sweep up and collect in a suitable container for disposal or reuse.

**Unusual Fire and Explosion Hazards:** Toxic fumes may be given off in a fire. See also sections on Thermal Degradation and Combustion Byproducts and Other Precautions.

**Special Fire Fighting Procedures:** Firefighters should wear self-contained breathing apparatus with a full facepiece operated in the positive demand mode when fighting fires.

**Extinguishing Media:** carbon dioxide  water  dry chemical  foam  other
