The HiPer-D is a M24308 intermountable and intermateable D-Sub with superior design features: one-piece machined shells, 200°C continuous operating temperature-rating, aerospace-grade fluorosilicone grommets and face seals, and EMI/RFI ground springs.
ADVANCED PERFORMANCE
Series 28 HiPer-D Connectors
The aerospace-grade D-subminiature

HiPer-D ADVANCED FEATURES COMPARED TO STANDARD MIL-DTL-24308

Improved panel mount and sealing design compared to standard
Improved board mount design compared to standard
Improved EMI / RFI backshell designs compared to standard
Precision-machined shells
High-speed contact arrangements including El Ochito®
Space-grade materials, finishes, and outgassing
Improved ground spring technology compared to standard
Improved triple-ripple wire grommet seal compared to standard
Improved interfacial seal compared to standard
