

## Special Hermetic Connectors

Sometimes a standard part just won't do. For these situations Glenair welcomes your custom requirements. Whatever the need, we can propose a solution and back it up with rapid design and prototyping. Glenair special hermetic connectors are made from the same passivated

stainless steel or ferrous steel shells, with glass insulators fused to the connector shell, and contacts meeting a leak rate of  $1 \times 10^{-7}$  cc/Helium per second. Innovative designs to meet every need are available from Glenair and, as always, **no minimums** are required.

Quick Selection Guide		
Part Number	Description	Page
<a href="#">237-263</a>	Special Micro Circular Quick Disconnect Receptacle, Rear Panel Jam Nut Mount	N-2
<a href="#">2570-1290</a>	Hermetic Single-Pin Feedthrough - Hi Temp, Hi Pressure	N-4
