MICRO-D High-Speed

Smallest and lightest aerospace-grade high-speed connector solution

Miniaturized Micro-D Connector / TwistPin contact solution with 10+ Gb/sec. performance per differential pair

High-speed datalink applications such as aircraft avionics and other high datarate and bandwidth equipment require both optimized data transmission performance as well as robust mechanical and EMC performance. Micro-D connector packaging with high-retention-force TwistPin contacts has a proven track record in standard signal and power applications. Now Glenair has developed a Micro-D solution—intermountable in existing Micro-D panel cutouts—that brings high-speed datalink performance to these mission-critical platforms. The High-Speed Micro-D is a 1 Amp pre-wired cable and PCB solution with 10+ Gb/sec. performance per differential pair. Auxiliary EMC ground springs on plug and integral contact separation architecture ensures data integrity and low attenuation performance.

High-Speed Micro-D connectors and cables are optimized for high-speed digital datalink protocols with machined-shell packaging, low attenuation contact spacing, and ultra low PPS dielectric insulators.

- **Pre-wired factory cordsets and PCB connectors**
- **Unique contact isolation and spacing for optimal high-speed performance**
- **Standard layouts support maximum #28 AWG wire**
- **Ultra-low dielectric material combined with optimized contact size and spacing**
- **Precision-machined shells with gold or nickel plating**
- **Hybrid contact solutions available with 3 amp and 1 amp TwistPin contacts (perfect for USB 3.0 SuperSpeed applications)**
