**Step 1**
Strip jacket back .400” Max. If pair is unjacketed, install shrink tubing .400” Max from end of wires.

**Step 2**
Trim shield back to jacket. Ensure that wires do not become separated underneath jacket.

**Step 3**
Insert #23 crimp contacts included with connector per recommended installation procedure.

**Step 4**
Insert contacts into adjacent cavities of high-speed mighty mouse connector with rear grommet removed (MOD-422B).

**Step 5**
