SAV-CON[®]

Circular Connector Savers

High reliability connector savers for mission-critical applications

Glenair Sav-Con[®] Connector Savers are designed to protect the quality and integrity of connectors that are mated and unmated frequently during manufacturing, test, check-out phases or environmental test programs. Available in general duty, environmental, and high-reliability performance classes with keyed polarization and optional locking mechanisms for bayonet style connectors, Glenair offers Sav-Con[®] Connector Savers for most all MS cylindrical connector series—many in-stock and available for immediate, same-day shipment.
